MANUAL HAND BALER MODEL MB-30

MANUAL. MOBILE. EFFICIENT.

A Hand Baler Machine is a Manual Equipment used for making bales of materials including plastic, paper, cardboard, farm-waste, etc. It is a single-person operating equipment with the provision of a spring loaded Compressing Lever, to make bales effectively, with the help of which the lever is positioned perfectly to dump the waste into the Baler and start compression.

- BETTER COMPACTION EFFICIENCY**
- SAFER OPERATION**
- COST-EFFECTIVE & ECO-FRIENDLY**
- COMPLETELY MOBILE WITH WHEELS**

ADVANTAGES / USES / USP

- IMPROVED BALE TYING OPERATION**
Designed for easy tying of bales with a lever locking system.
- INCREASED PRODUCTIVITY**
Speeds up waste handling and bale formation.
- BETTER COMPACTION EFFICIENCY**
Spring loaded compressing lever ensures high-density bales.
- MANUAL – NO POWER SUPPLY REQUIRED**
Runs completely on manual operation.
- COMPLETELY MOBILE**
Equipped with wheels for easy movement and handling.
- SLOTTED DOOR FOR EASY TYING**
Slots provide better access and leverage to tie the bale securely.
- MAINTENANCE FREE**
Simple design with durable components for long life.
- ECONOMICAL & ENVIRONMENT FRIENDLY**
Reduces waste volume, saves space and improves waste management.
- RUST FREE MATERIAL**
Built with high quality rust free materials for durability.
- OFFERS LONGEVITY**
Robust construction and quality design for longer service life.
- AIDS IN WASTE MANAGEMENT**
Effective solution for cleanliness and organized waste handling.

TECHNICAL SPECIFICATIONS

Machine Foot Print	33" x 45"
Max Bale Weight	15 – 25 kg
Bale Foot Print	22" x 22"
Ideal Bale Height	10" – 12"
Bale Making Time	8 – 10 mins
Provision of a Second Door	Yes (on backside)
Back Door for Easy Removal	Yes
Accessories	• 2 Wheels for Easy Mobility • 10 Slots, 3 on the Door and 3 on the Backside • Lever Handle Grip for better control

USED FOR BALING OF FOLLOWING TYPES OF WASTE

Plastic Wraps
Stretch Wraps

Cardboard

Paper Waste

Shredded Paper

Farm Waste
